Kildare Biodiversity Week

Kildare Biodiversity Week has been organised to develop awareness of the importance of biodiversity and to better understand its value to the local, national and international communities. Kildare Biodiversity Week is part of a European initiative to encourage people to take an interest in their local Biodiversity. The people of Kildare are invited to get out into Kildare's Biodiversity, to visit Kildare wild spots, lakes, rivers, bogs, woodlands or to simply enjoy the biodiversity of their back garden.

This listing of events has been compiled by Kildare County Council. All events listed here are free. Children are welcome but should be accompanied by a responsible adult. Please dress suitably for the weather. Dogs must be on leads.

Biodiversity

The word 'biodiversity' is coined from biological diversity, which, put simply is another way of referring to the variety of life on the planet. Biodiversity is about the variety of plant and animal species and the interaction between them. It is this interaction that is essential for life, giving us all the things we need - clean air, water, agriculture, food and amenity.

This year the Convention on Biological Diversity (CBD) has designated "Mainstreaming Biodiversity; Sustaining People and their Livelihoods" as the theme for International Day for Biological Diversity 2016.

Biodiversity is the foundation for life and for the essential services provided by ecosystems. It therefore underpins peoples' livelihoods and sustainable development in all areas of activity, including economic sectors such as agriculture, forestry, fisheries and tourism, among others. By halting biodiversity loss, we are investing in people, their lives and their well-being.
